MICHAEL JAY MAPA MURRY

BSIT Student | Web and Game Development

murrymikel9990@gmail.com | 09610566136

Brgy. San Antonio, Malitbog, Southern Leyte, Philippines

SUMMARY

Information Technology student majoring in Programming with project experience in Laravel and PHP web applications, Unity games, and ESP32 sensor systems. Contributed to an online food ordering platform, a flood warning prototype, and a swine health monitoring prototype. Seeking an internship or OJT in web or software development to contribute to practical projects and develop professional experience.

EDUCATION

Bachelor of Science in Information Technology

Major in Programming | Expected graduation: 2027

Southern Leyte State University, Tomas Oppus Campus

Brgy. San Isidro, Tomas Oppus, Southern Leyte

EXPERIENCE

Web and Game Developer | Project-Based Experience

Independent and collaborative projects, Southern Leyte

- Collaborated on web applications with customer and administrator interfaces, including feature development, debugging, testing, and deployment.
- Developed Game Collection with Laravel and built 2D games in Unity, implementing application features and gameplay mechanics.

SELECTED PROJECTS

Online Food Ordering and Shopping Management System

Laravel, PHP, MySQL, PostgreSQL, Docker, JavaScript

- Helped build a web platform that centralizes food orders previously handled through Messenger conversations.
- Implemented GCash checkout using a QR code uploaded by the business administrator.
- Integrated email notifications for new and cancelled orders and for accepted, rejected, or delivered orders.
- Developed an administrator dashboard for orders, drivers, sales, and analytics.

Flood Warning System

ESP32, C/Arduino

- Contributed to an ESP32-based prototype that warns users of potential flood danger.

SELECTED PROJECTS CONTINUED

Swine Health Monitoring Prototype

ESP32, infrared sensor, sound sensor, C/Arduino

- Built an ESP32-based prototype using infrared and sound sensors to flag possible health concerns in swine.
- Combined infrared and sound inputs to support observation of changes in an animal's condition.
- Programmed the microcontroller in C/Arduino to read sensor inputs and support user alerts.
- Designed alerts to prompt caretakers to check animals that may need attention.

Game Collection

Laravel, PHP | Mobile app | Unhosted

- Developed a personal game library with cover images, platforms, genres, play status, ratings, and notes.
- Implemented adding, editing, and deleting games, along with profile picture customization.

Stellar Siege

Unity, C# | Android

- Developed a single-player 2D space survival shooter with enemy waves and player controls.

CERTIFICATIONS

Google AI Essentials | Google (Coursera)

Maximize Productivity With AI Tools | Google (Coursera)

Use AI Responsibly | Google (Coursera)

The Arduino Platform and C Programming | University of California, Irvine (Coursera)

Guided Website Development Project | University of Washington (Coursera)

TECHNICAL SKILLS

Web development: HTML, CSS, Tailwind CSS, JavaScript, React, PHP, Laravel, Node.js, Next.js

Game and embedded development: Unity, C#, ESP32, C/Arduino, Arduino IDE

Data and tools: MySQL, PostgreSQL, phpMyAdmin, Docker, Git, GitHub, VS Code, Visual Studio

AI tools: ChatGPT, Claude, Gemini

WORKING STRENGTHS

Debugging and troubleshooting; careful handling of data; teamwork and communication; organizing project tasks; learning unfamiliar tools.
